HF8R Work

HF8R Work

PRODUCT DESCRIPTION

Our Ledlenser HF8R Work is the robust flagship model for working in the dark over extended periods of time. The highlight: Our patent-pending Adaptive Light Beam Technology allows automatic dimming and focusing. Thus, the HF8R is our first headlamp which can be used hands-free and requires no manual control at all. Thanks to our patent-pending Digital Advanced Focus System, the HF8R Work allows virtually seamless focusing. Moreover, it can be controlled remotely via Ledlenser Connect App (paid upgrade with additional features available) and comes with an aluminum housing as well as protective elements at the front.

- Dims and focuses automatically thanks to our patent-pending Adaptive Light Beam technology; hands-free use
- Powerful headlamp with red front light and innovative Digital Advanced Focus System
- Extremely powerful battery
- Protective elements at the front; suitable for continuous immersion in water (IP68)
- Extensive scope of supply for various mounting options and applications

FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

1) Measurement values according to ANSI FL1 in the respective setting. If no setting is explicitly indicated, the values refer to luminous flux (lumens/lm) and lighting range (meters/m) on the highest setting, and to battery duration (hours/hrs/h) on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If the light is equipped with (a) colored LED(s), the measurement values are given for the white light or the white LED. If the light has different energy modes, the measurement is made based on the "energy saving mode".

2) Calculated capacity value in watt-hours (Wh). This applies to the delivery state of the battery/ies inside the respective item, or for lights with rechargeable battery/ies, to the rechargeable battery/ies inside the product when fully charged.

5) Charging time varies by hardware used.
