WORK

Lighting Professionals at Work.

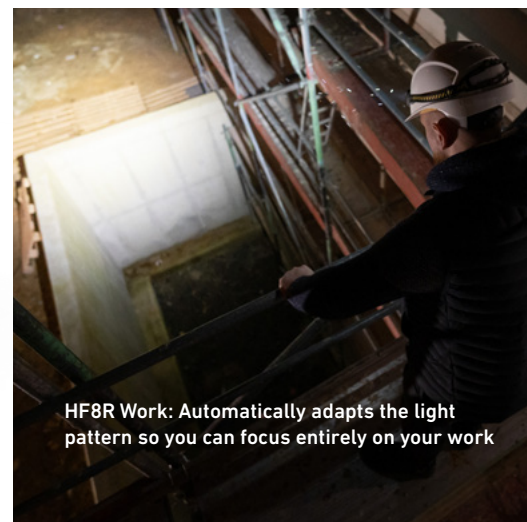

Robust companions for industry and trade with a high color rendering index for close-range work, protective elements and a rubberized headband.

HF4R Work: Basic model for professionals – lightweight, compact and robust

HF6R Work: Powerful all-rounder for industry and trade

HF8R Work: Automatically adapts the light pattern so you can focus entirely on your work

THE LIGHT THAT ADAPTS TO YOU

Revolutionary technologies for maximum flexibility: With the HF-series, Ledlenser introduces its first absolutely hands-free headlamp. Nothing breaks your flow anymore – and you can always rely on a perfect light pattern. Without a battery box at the back of your head or an additional cable at the headband.

DIGITAL ADVANCED FOCUS SYSTEM

Patent pending

For a virtually seamless transition from homogeneous floodlight to focused spotlight. The Digital Advanced Focus System enables a slim design, ideal lighting for different ranges and permanent peripheral vision.

REVOLUTIONARY PATENT-PENDING TECHNOLOGIES

ADAPTIVE LIGHT BEAM

Patent pending

Dims and focuses automatically, so that the light is adapted to changing environments and obstacles; from uneven forest ground and wet sidewalks to narrow machine compartments.

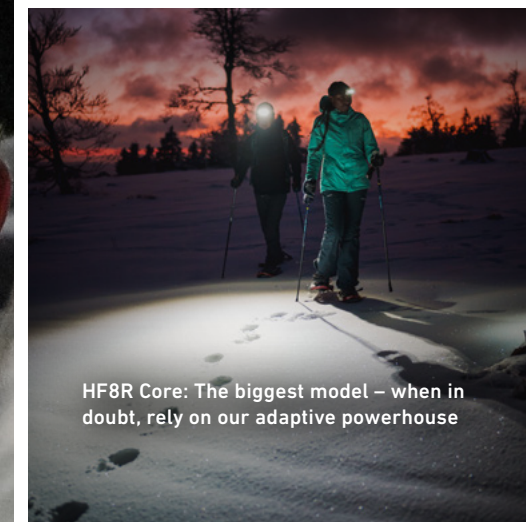

The system detects reflections as well as overall light conditions and controls all light sources separately. This does not only result in an ideal illumination and focusing, but it also enables completely hands-free use.

HF4R Core: Entry-level model – ideal for walking the dog or camping

HF6R Core: The golden mean – suitable for hiking or more ambitious DIY projects

HF8R Core: The biggest model – when in doubt, rely on our adaptive powerhouse

CORE

Loyal Lights for Every Day.

Basic models with additional red front light, premium light pattern and superior price-performance ratio.
